Work Experience

NeuAnalytics | *Software Developer Team Lead*   September 2020 – Present
- Continued software developer responsibilities while working as lead to assist through transition period
- Led a team of 5 developers assisting with technical details, documentation, and mentoring
- Create Objective's for the team and ensure Key Results are met within each quarter
- Updated legacy dynamic distribution process to generate uplift and MRR of additional 10K per month
- Design out features with Product Owner to ensure Development has what it needs to be successful
- Monitor 2-week deployments with other team lead to ensure successful automated deployment
- Work as a developer with additional Admin responsibilities (Capacity planning, Phone screens, etc.)

NeuAnalytics | *Software Developer*   April 2017 – September 2020
- Created or migrated 10+ pages from Angular JS to React while creating common reusable components
- Added to a Windows Service in C# that send emails to subscribed users after files have been processed
- Created the UI in React that allows an end user to self-manage subscribed users and corresponding jobs
- Enhanced and improved existing Web API used primarily for imports and exports
- Led ETL implementation for new clients and vendors from development to production stages
- Created a common reconciliation process used to monitor account locations and corresponding balances
- Constructed tables, views, functions, and other procedural code in Microsoft T-SQL
- Facilitated UI team by helping with bug fixes and features using HTML5, CSS, AngularJS, and React
- Contributed deploying releases to UAT, staging, and production environments in 2-week sprint cycles
- Optimized SQL procedural code to increase performance and decrease overhead

NeuAnalytics | *Development Operations Analyst*   November 2015 – April 2017
- Constructed various ad hoc reports with Microsoft Report Builder for management and executives
- Rotated on call to ensure 24/7 support and 99.999% up time
- Built SSRS reports based off business requirements given from our Client Operations Team
- Wrote SQL queries to identify data discrepancies in data and helped solve development inconsistencies
- Created Key Performance Indicators as well as display them on internal dashboards
- Assisted DBAs in database moves to new servers and deployment validation
- Participated in QA for validation of new logic requested added to specific jobs or stored procedures

PNC/Midland Loan Services | *Loan Servicing Analyst II*   July 2013 – November 2015

- Accurately reported on approximately 40 commercial mortgage-backed securities to investors, rating agencies and other capital markets as directed by servicing contracts while meeting agreed deadlines
- Productively accountable for multimillion-dollar wire transfers to trusts and other related external parties dealing with principal and interest collections, taxes, insurance, curtailments, balloon payments, etcetera
- Responsible for internal monthly advancing tie-outs with executive management and PNC corporate
- Worked in a team environment as well as an individual on special projects dealing with claw backs, investment grade bonds, miscellaneous/late fees, property protective advances, other loan servicing fees
- Managed advances on trust expenses and the repayment to corporate
- Created a custom form in MS Access used daily to account for delinquent payment
